This is the first official video game of an original Neon Tide story. You become the masked Agent with one goal, to end the evil organization Vampires Rising. A dark organisation where illegal activities are expected, the story unfolds when Agent is forced to work undercover, and begins to question who he really is. Choosing to battle in the dark waters, or in the bright skies of the Pacific Ocean, Agent fights through battles and quests to discover the truth about the person that he was once. The creators of Neon Tide went to the effort of changing the fashion, weapons and enemies to fight for the game. The combat works like a proffesional third person shooter, the story is a light adventure and you can feel the awesomeness on how to fight the enemy. Directed and Executed by me, Kristofer Bäck. The Rare, Unicorn-Filled Unicorn Rescue File Every once in

a while, somewhere in the world, a really rare horse or pony is born. It is a true unicorn, and it is rare for a unicorn to appear in a normal place. Unlike a normal horse, a unicorn is born with one single, unicorn-shaped horn on his/her head. But it doesn't have to be that way. Because, somewhere out there, right now, there is a unicorn or two that have been born without their

Bernie's Nightmare tells a terrifying true story about the craziest experience a boy could have in a video game. Learn what happened when a kid decided to play a game based on his dream. A boy by the name of Bernie recounts his childhood experience with horror, telling his story in voice-over only mode through flashbacks. He narrates how he found a drawing of a nightmare game; the world he lives in, where he can jump around and explore. The game is played on a black background, with nothing but a white-colored pencil for his actions. The gameplay revolves around a first-person perspective. Bernie explores this world by jumping through the different rooms, and enemies appear on the map. The more disturbing, frightening or nightmarish the room, the more they hurt the player. Bernie can touch and use objects such as paintings and statues, an action that will probably tell us how he ended up in this strange world. In his new world, different enemies appear, and players can only escape by jumping to the top of the screen. If Bernie falls down to the bottom, he'll lose life. Besides the regular enemies, there are hidden enemies that startle him by letting out a loud "peep". Their bodies move too fast and they're even able to follow him or scurry on walls. By touching one of them, Bernie will always lose life, so the player has to run away to avoid them as far as he can. There's no way to explore or find any hints in this game. The only thing that may help the player is the fact that he is also an entity in this

world. Many times, he will discover a part of himself by looking at a painting in the room and he'll fall asleep watching a TV with some scary images. Perhaps it's a way to relax him, or perhaps it's just another tool for the evil games master, that's still not sure. Bernie lives in a strange and scary world. He must learn to survive and, of course, to keep playing. The player will solve this by controlling the characters with the arrow keys and pushing away the enemies with the spacebar. Why did so many great minds come together in the 1960s and 1970s to create what they called 'Mainstream Rock?' They were usually college-educated and refined in their personality, far removed from the working classes they so despised. 'Mainstream Rock' sprang from a movement that bred thousands of clever blues musicians a generation earlier, during the depression and collectivist unity of the 1950s. The indie bands of the 60s really had no connection with the cultural higher echelons, they came from the lower classes with nothing but visual contact with the rich. They were often more talented and talented. Taking advantage of opportunities opened up by the post-war squandering of labor and people's lives in bucolic recreation, millions of artists from all over America and Europe gathered in the flower fields and city parks to sing about 'the good old days,' 'findin' faith' (Jack Dee song) etc, and 'where it's at' with no idea that this would soon be the future. But 'Mainstream Rock' is mostly a political creation. The most obvious example
