includes bluetooth & osdp reader module and metallic backplate sticker to upgrade one reader. compatible with iClass SE, MultiClass SE. HID part numbers: for r10/rp10 readers: bleosdp-upg-a-900 for r15/rp15 readers: bleosdp-upg-a-910 for r40/rp40 readers: bleosdp-upg-a-920 for rk40/rpk40 readers: bleosdp-upg-a-921 adi p/n hu-bleosdpua, hu-bleosdpup, hu-bleosdpu9, hu-bleosdpug anixter p/n 9808272, 9881748, 1030606, 1029839 if you have the time and resources, iClass is a great investment. iClass cards offers several key benefits and are completely customizable, which is what makes them so popular. iClass cards have been around for over 20 years and there are thousands of different models available. iClass cards can be used for a wide variety of applications, including but not limited to access control, time and attendance, membership cards, and loyalty programs. iClass Pro smart cards can be used with any iClass Pro installation for unlocking doors, access to restricted areas, and for identification purposes such as building access, checking out equipment, and paying for lunch. Smart cards take that concept cards and readers sharing data and adds needed layers of data protection and functionality. iClass smart cards can hold much more data than Prox cards so they can be used for multiple things including building access, checking out equipment, and paying for lunch. The ideal form of payment is a card. The card is most suitable for organizations that need a comprehensive solution compatible with multiple conventional access control systems. Organizations in need of upgrades toward better security, but limited budgets, can use these cards while taking steps to complete the full process.

## Iclass 9696x Pvr Upgrade S9f4a126

the proximity cards are compatible with all iclass proximity readers. the proximity cards include a hall effect proximity switch to provide contactless card detection and a series of 3.3v or 5v signals to indicate proximity. proximity cards are useful in applications such as retail, transportation, access control, government and financial services, and many other areas. you can also download a free trial version of iclass reader software from our downloads page. trial versions are intended for use during development and testing only. if you do not have a previous hid account, you must register for one before you can use the product. iclass se is the latest generation, which can be considered a more powerful card. its capable of storing more data and also features a more advanced sio (secure identity object) which ups the level of encryption again. like other iclass cards, you can order to feature other technology including mifare, prox and magstripe. smart cards take that concept cards and readers sharing data and adds needed layers of data protection and functionality. iclass smart cards can hold much more data than prox cards so they can be used for multiple things including building access, checking out equipment, and paying for lunch. utilizing the ospd upgrade module with iclass se and multiclass se readers extends security from the reader all the way through the communications connections, while providing a number of advanced features such as the ability to now centrally manage readers. the module allows for bi-directional communication that also enables users to change configurations as well as poll and query readers from a central system, reducing costs and improving the ability to service readers. the incorporation of secure communication protocol (scp) into ospd increases the security of reader connections and the use of transparent mode enables a virtual direct connection to smart cards at the reader. 5ec8ef588b
